Grocery shopping reading comprehension

Read the text and write if the statements are TRUE or FALSE.

Hello, my name is Kevin! My grandmother asked me to go to the grocery after school. She gave me 40 dollars to spend and a shopping list with ten items on it. Six of the items on the list are food. She wants me to buy eggs, milk, cheese, bread, cereal, and apples. Four of the items are household supplies. She wants me to buy dish soap, laundry detergent, paper towels, and toilet paper.

At the store, I go to the food aisle first. They have many kinds of apples, but I pick red ones because my grandmother likes them best. I walk to the egg section next, but the shelf is empty. I ask an employee, and he tells me they are sold out. Luckily, the store has all the other food items I need. The employee helps me find the milk, bread, and cereal. I also grab a small block of cheese. Then I go to the cleaning aisle to find the household items. I put dish soap, laundry detergent, paper towels, and toilet paper into my cart. Finally, I go to the checkout line to pay. The total cost is \$35.50.
